Subject: **FEBRUARY WATER SAMPLES**

During the month of February 2019, there were only two water sampling events since the weather created problems getting the water samples down to Boise.

02/04/19 – called and talked to Judy Danielson. John is in the hospital with pneumonia so Katherine did the mail and will have the water samples. Since Katherine had to go in for surgery, she would not be going up on Wednesday and Friday was iffy.

Week of 02/11/19 – received a call from Jim I’nama. He said there would be no water samples today since they weren’t sure if the mail was coming. I told him I would call Judy Danielson later to find out. Judy gave me Katherine’s phone number. I contacted Katherine on Tuesday and she told me she had tried to go up but her transfer case for the 4-wheel drive went out. On Wednesday, she attempted to go up the road again but couldn’t get past Cottonwood due to the road conditions and had to turn around. She said she could try again on Friday for the samples but I told her we couldn’t get them to the lab on Saturday so would wait until next week.

Week of 02/24/19 – On Tuesday I texted Katherine to see if she had the water samples. She told me that she had started up on Monday but had to turn around at Loftus Creek due to the road conditions. On Thursday I got a telephone call from Joe I’nama and he said that there would be no water samples this week since there was a big slide around Arrowrock and now the Middle Fork Road is closed. The highway crews started working to get it open March 1 & 2.
